

# APURBA HALDER

Bhubaneswar, Odisha, India | [apurbahalder.rnc@gmail.com](mailto:apurbahalder.rnc@gmail.com) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

## Summary

Third-year Computer Science student at KIIT (CGPA: 9.7/10.0) with hands-on full-stack development experience – shipping production frontend features, building backend services, and developing real-time web applications. Hackathon builder and regular LeetCode solver seeking Software Engineering internship and full-time roles.

## Experience

**Frontend Web Developer Intern** | OpenRAG (Remote)

July 2025 (1 Month)

- Rebuilt the entire frontend of LangVault AI, an instant document-translation product, redesigning the existing HTML/CSS UI with a glassmorphism aesthetic and an animated floating-circle background.
- Built a responsive navigation system including a mobile hamburger menu with open/close toggle, a glassmorphism-styled nav link background, and new About Us and Contact Us sections.
- Implemented dark/light mode color theming and rewrote on-page content for clarity, improving the overall visual consistency of the product.

## Education

**Bachelor of Technology - CSE** | Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar  
CGPA: 9.7 / 10.0

2024 - Present

- Active member of Konnexions (Operations & HR) and eLabs (Java), supporting campus events, collaboration, and technical learning initiatives.

## Projects

**Spill Tea - Real-Time Anonymous Chat Rooms** | Next.js, TypeScript, Socket.IO, Tailwind CSS, WebSockets

- Built a real-time, room-based chat application supporting instant messaging, live presence, and debounced typing indicators via WebSocket event broadcasting.
- Architected a decoupled client-server system with a standalone Socket.IO server (Render) and a Next.js 15 App Router frontend (Vercel), using shareable room codes for isolated chat sessions; tested with up to 10 concurrent users with no noticeable message delay.
- Implemented type-safe message handling using TypeScript discriminated unions and designed a responsive, mobile-first UI with overlay-based navigation.

**PulstriX - Intelligent Emergency Response System** | Next.js, TypeScript, FastAPI, MongoDB, Leaflet.js

IIT Jodhpur Hackathon

- Coordinated task planning and work distribution across a 5-member team to build an emergency response platform for incident reporting, location tracking, and responder assignment.
- Designed the frontend page layout and UI using Next.js, TypeScript, and Leaflet.js, and contributed to backend integration alongside FastAPI and MongoDB workflows.

## Technical Skills

**Programming Languages:** Java, JavaScript, TypeScript, C, Python

**Data Structures & Algorithms:** Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Hashing, Sorting, Heap, Searching, Recursion, Time & Space Complexity

**Web & Backend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, Tailwind CSS, REST APIs, WebSockets (Socket.IO), JWT Authentication

**Tools & Databases:** Git, GitHub, PostgreSQL, MongoDB, Firebase Realtime Database, Postman

## Additional Information

- Hackathons: Frequent participant; builds functional software under time pressure using strategic thinking and rapid prototyping.
- Competitive Programming: 216+ problems solved on LeetCode, strengthening DSA and algorithmic problem-solving in Java.
- GirlScript Summer of Code (GSSoC) 2026 – Contributor.
- Certification: The Complete Full-Stack Web Development Bootcamp (Udemy, Angela Yu).
- Currently learning Python for AI/ML, moving next into ML-focused math libraries.
